Peco Energy
Monsanto
Fireside Thrift
Christ Church of Oak Brook
Girl Scouts of America
San Jose State University
RayChem

Technical Needs

Preparing for Deanne DeMarco's Multi-media Presentations

1. Wireless Lavalier microphone with a fresh battery
2. LCD Data projector for use with PowerPoint (Deanne brings her own wireless remote and MAC lap top)*
3. Large Screen
4. Medium size table to my left as I face the audience, please
5. Easel for signs
6. Speakers stool
7. Product table in the back of the room

Due to the imbedded graphics, and video Deanne's presentation must run from her lap top and will not be transferred to a house system. She needs to be able to position her laptop off to the side and within 20 feet of the middle of the stage. Because the presentation moves so quickly- Deanne needs to be in full control of her lap top and uses a remote device.

Lighting & Screen

The room needs to be fully lit to maintain a high energy level in the audience. Screen should be positioned off to the side so that all audience members can see it however- not directly behind so she is not walking in front of it.

Handouts/Worksheets

If appropriate, Deanne will send a master handout / worksheet to be duplicated for all program participants prior to the event. Deanne requests that these not be distributed to the audience prior to her program.

Recording

Recording the presentation by audio or video is not allowed without express written permission of the speaker. While Deanne will often allow taping- arrangements MUST be made prior to event.
